Text styling

text-emphasis

Filled dots over each letter, open circles under, and a custom mark.

Sesame marks over larger text

text-indent with hanging, each-line and percentages

> A hanging indent leaves the first line where it is and indents every other line of this paragraph, as in bibliographies and lists of references.

each-line indents the first line and each
line after a forced break.

This line follows a line break and is
indented too, while wrapped lines are not.

A percentage indent is a share of the
paragraph's width, here a quarter of it.

::first-line background

The first line of this paragraph has a background, a colour and a bold weight of its own, and the lines after it keep the paragraph's style.

text-underline-position

auto: gypsy jog · under: gypsy jog · from-font: gypsy jog

line-clamp and block-ellipsis

Only two lines of this paragraph are shown and the second ends with an ellipsis because line-clamp…

Only two lines of this paragraph are shown and the second ends with a mark of its own becaus [more]
