# Footnotes and definition lists

Footnotes[1] go to the bottom of the page where they are referenced, numbered in the order of first use. A footnote can hold several blocks[2], and a second reference[1] links to the same note.

## Glossary

**CommonMark**

: The Markdown specification that PdfPecker follows.

**GFM**

: GitHub Flavored Markdown, which adds tables, task lists, strikethrough, autolinks and footnotes.

**Front matter**

: The YAML block at the start of this file. It is not rendered, and its `title` becomes the PDF title.

  A definition can have several paragraphs.

---

3. A footnote that only another footnote cites is listed after the text.

1. A short footnote, which cites another[3].
2. The first paragraph of a longer footnote.

   Its second paragraph, indented by four spaces, and a list:

   - one
   - two
