1. Revenue and orders

The new pricing model was introduced in August and now covers two thirds of all contracts. Support tickets per customer dropped for the third quarter in a row. Revenue grew in every region this quarter, led by renewals from existing customers. We expect the fourth quarter to follow the usual seasonal pattern, with December as the strongest month. Energy costs were stable, and travel spending was lower than budgeted. Delivery times fell by a day on average after the warehouse moved to two shifts.

Revenue	Margin	Orders
1,237 k	19 %	351

The new pricing model was introduced in August and now covers two thirds of all contracts. Support tickets per customer dropped for the third quarter in a row. Revenue grew in every region this quarter, led by renewals from existing customers. We expect the fourth quarter to follow the usual seasonal pattern, with December as the strongest month. Energy costs were stable, and travel spending was lower than budgeted. Delivery times fell by a day on average after the warehouse moved to two shifts.
